Examination Data

Credential	Certified Medicaid Planner
Reporting Period	Calendar Year
Form Name	Form A
Form Creation Date	1/1/2012

Total # Tested on This Form in Reporting Year

14

Pass Rate

50

Passing Point

65%

Average Score

62.8%

Raw or scaled score?

Raw

Standard Deviation

16.9%

Standard Error

3.1%

Decision Consistency

.956 (Brennan-Kane Index of Dependability)

Reliability Estimate

.97 (Cronbach's alpha)

Exam Items

160 items, fixed

Explanation

Thank you for your question. In reviewing the data provided by our psychometrician, I believe there was an error in the input. There were only 14 (not 24) examinees within the testing period. The passage rate was 50% so there were only 7 examinees that passed (not 12). I believe that 24 was put in instead of 14 as a typo and the 50% ratio was applied to 24 to get 12. So that should be 14 and 7; however, because it's requesting a percentage it should be 14 and 50. I have copied and pasted the report from our psychometrician below. I apologize for the confusion and appreciate the opportunity for clarification.

Name of Credential: Certified Medicaid Planner

Form Name: A

of candidates: 14

% candidates passing: 50%
